

SAFEGUARD LONE WORKERS **ANYWHERE**

Whether you have a workforce of ten or thousands, GeoPro is a complete lone worker safety monitoring solution that can be quickly deployed to protect employees and address employer duty of care. When used with inReach SE, our hosted web app and monitoring service, GeoPro is simply the easiest and most effective way to monitor the well-being of employees working alone.

Complete Peace of Mind at Isolated Sites

Ideal for job sites without reliable landline or cellular coverage, inReach SE is a two-way satellite communicator with GPS that equips employees with easy check-in, tracking, and SOS alerting. Compact and designed for the rigors of use outdoors, it provides 100% global coverage.

GeoPro work alone safety features

- ✓ Two-way SOS alerting, with the ability to confirm or cancel emergencies
- ✓ Two-way text messaging via email and SMS (160 characters)
- ✓ Easy check-in with automated reminders
- ✓ View activity log including message history

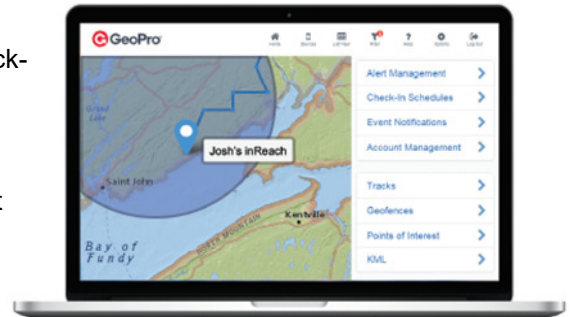

GeoPro Web App: Your Safety System, Your Rules

Secure, fully hosted and easily adapted to your safety practices, the GeoPro web app offers you complete control. Define your emergency protocols and escalation contacts, and GeoPro will sound the alarm to ensure a prompt response. You'll be able to use our dashboard to view emergencies in real-time – whether they're managed by our expert monitoring service, or your in-house personnel.*

GeoPro makes it easy to:

- ✓ Monitor employee status and location from your web browser
- ✓ Centralize management of alerts including SOS, overdue check-in, crossed geofence, or changes in speed or altitude
- ✓ Setup check-in schedules and automate monitoring
- ✓ Alert escalation contacts immediately when there's an incident
- ✓ Respond more promptly and effectively to emergencies
- ✓ Manage licenses in real-time (add, suspend, or cancel)
- ✓ Access incident logs and reports

Affordable, Pay-as-you-go Pricing

Switch, cancel or suspend at any time

Share data allowances with other inReach devices on the same account

Includes use of the Geopro web app, and GEOS monitoring
